

Python Secrets You never Knew

@python.wizards

List Duplicates

```
from collections import Counter

def list_duplicates(lst):

    counter = Counter(lst)
    duplicates = [item for item, count in counter.items()
if count > 1]
    return duplicates
```

@python.wizards

String Reverser

```
def string_reverser(string):  
    return string[::-1]
```

@python.wizards

List Unique Elements

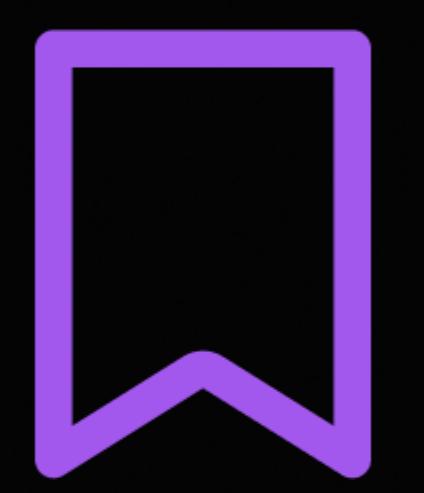

```
def list_unique_elements(lst):  
  
    unique = []  
    for item in lst:  
        if item not in unique:  
            unique.append(item)  
    return unique
```
